Office Action Summary

Application No.

09/990,437

Applicant(s)

ASHKENAZI ET AL.

Examiner

Claire M Kaufman

Art Unit

1646

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 August 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 123-125, 129-131 and 135-138 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 131 is/are allowed.
- 6) ☐ Claim(s) 123-125 and 135-138 is/are rejected.
- 7) ☐ Claim(s) 129 and 130 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

The rejections of claims under 35 USC 112, second paragraph and first paragraph-written description, are withdrawn in view of the amendment to the claims or moot in view of cancellation of the claims. A new rejection appears below due to the amendment.

The rejections of claims under 35 USC 102 as anticipated by US 6,607,879 and 5,952,223 are withdrawn in view of the amendment to the claims. Neither of the cited US Patents or the discloses the full coding sequence of SEQ ID NO:32 or a nucleic acid at least 99% identical thereto. Note there is a new rejection under 35 USC 102.

Claim Interpretation

For claims drawn to "An isolated nucleic acid comprising a nucleic acid sequence" of SEQ ID NO:32 or encoding a polypeptide of SEQ ID NO:33 (Claim 124), the specification appears to intend that the nucleic acid and amino acid sequences are contiguous, but the isolated nucleic acid and polypeptide may include additional nucleic acid or amino acid sequence, respectively, on either end of said sequence (*e.g.*, p.304, lines 19-25). With this interpretation, the splice variant of GenBank AB011112.1 which encodes a polypeptide identical to SEQ ID NO:33 of the instant application with the exception of a 30 amino acid insert and is encoded by a nucleic acid identical to SEQ ID NO:32 with the exception of a 90 nucleotide insert, would not qualify as a nucleic acid comprising the nucleic acid sequence of SEQ ID NO:32 or encoding the polypeptide SEQ ID NO:33. For this reason, the GenBank reference is not being applied to claim 124. If Applicants feel this interpretation is in error, this should be stated in the response to this office action and will not preclude the next Office action from being made final since the issue was raised here.

This interpretation does not apply to isolated nucleic acids 99 % identical (or some other % identity) to SEQ ID NO:33, which allows gaps/inserts (see art rejection below).

Claim Objections

Claims 123-125 and 129 and 130 are objected to because of the following informalities: the SEQ ID NO: appears in parenthesis, which appears to be an advertent typographical error introduced by the amendment to the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 123 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 123 is dependent on cancelled claim 119, so the metes and bounds of the claim are not clear.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 123-125 and 135-138 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the nucleic acid of SEQ ID NO:33 or a nucleic acid sequence at least 99% identical to SEQ ID NO:32 wherein said nucleic acid is amplified in squamous cell-type lung carcinomas, does not reasonably provide enablement for a 99% identical nucleic acid amplified in colon tumors or for a nucleic acid encoding a polypeptide of SEQ ID NO:33. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims and for the reasons set forth in the previous Office action and for the following reasons directed to the claims as amended.

The amendment to claim 123 introduces a functional limitation requiring said nucleic acid be amplified in squamous cell-type lung carcinomas (SqCCa) and colon tumors; however, while there is enablement for the amplification in squama cell-type lung carcinomas as indicated in the previous Office action on page 5, lines 15-18, with 5/11 SqCCa showing a $\Delta Ct > 1.0$, only 2/17 colon tumors had a $\Delta Ct > 1.0$, which is not a significant number on which to base enablement as a

Art Unit: 1646

colon tumor marker. Also, as stated in the previous Office action on page 5, lines 18-21, "Detection is predicated on structural relationship of the nucleic acid probe to nucleic acids) in the tumor tissue. One skilled in the art would not predict that detection would have the required sensitivity if the probe sequence differed from SEQ ID NO:33 such as the sequence of a degenerate nucleic acid or a hybridizing nucleic acid." Claim 124 is drawn to a nucleic acid encoding a polypeptide of SEQ ID NO:33, which because of degeneracy of the genetic code would not be enabled unless the nucleic acid had the sequence of SEQ ID NO:32.

Applicants argue that the amendment to the claims provides enablement. The argument has been fully considered, but is not persuasive. For the reasons set forth above and in the previous Office action, the amendments do not make the claims listed in the rejection above due to inclusion of amplification in colon tumors or to inclusion of degenerate encoding nucleic acids.

Priority

Additionally, Applicants' argument directed to priority are persuasive in that priority application 60/141,037 (06/23/99, *e.g.*, p. 161 line 20) does disclose the enabling gene amplification data also found in the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 123 is rejected under 35 U.S.C. 102(a) as being anticipated by GenBank AB011112.1.

GenBank AB011112.1 teaches a nucleic acid at least 99% identical to SEQ ID NO:32 of the instant application. See attached SEQUENCE COMPARISON GenBank AB011112.1.

Note that for the nucleic acid there are only 3 mismatches over 3504 nucleotides with the admittance of a gap. This leads to a >99% identity. The following definitions percent identity are from the specification:

Art Unit: 1646

"Percent (%) nucleic acid sequence identity" with respect to PRO-encoding nucleic acid sequences identified herein is defined as the percentage of nucleotides in a candidate sequence that are identical with the nucleotides in the PRO nucleic acid sequence of interest, after aligning the sequences and introducing gaps, if necessary, to achieve the maximum percent sequence identity. Alignment for purposes of determining." (p. 309, lines 1-4)

Conclusion

Claims 129-131 are allowable except for the objection to claims 129 and 130.

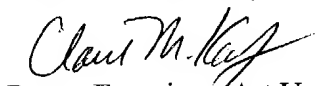

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Claire M. Kaufman, whose telephone number is (571) 272-0873. Dr. Kaufman can generally be reached Monday, Tuesday and Thursday from 8:30AM to 2:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can be reached at (571) 272-0961.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (571) 272-1600.

Official papers filed by fax should be directed to (703) 872-9306. NOTE: If applicant *does* submit a paper by fax, the original signed copy should be retained by the applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office. **Please** advise the examiner at the telephone number above before facsimile transmission.

Claire M. Kaufman, Ph.D.

hypothetical protein KIAA0540 - human (fragment)

C;Species: Homo sapiens (man)

C;Date: 01-Feb-1999 #sequence_revision 01-Feb-1999 #text_change 11-Jan-2002

C;Accession: T00271

R;Nagase, T.; Ishikawa, K.; Miyajima, N.; Tanaka, A.; Kotani, H.; Nomura, N.; Ohara, O.

DNA Res. 5, 31-39, 1998

A;Title: Prediction of the coding sequences of unidentified human genes. IX. The complete sequences of 100 new cDNA clones from brain which can code for large proteins in vitro.

A;Reference number: Z14086; MUID:98290545; PMID:9628581

A;Accession: T00271

A;Status: preliminary; translated from GB/EMBL/DDBJ

A;Molecule type: mRNA

A;Residues: 1-1113 <NAG>

A;Cross-references: EMBL:AB011112; NID:d1185382; PIDN:BAA25466.1

A;Experimental source: brain

C;Genetics:

A;Note: KIAA0540
